So happy to work with them (Planet Fitness) however if these non-members were so willing to relocate when we showed up was their security making any effort? We can't be their private security replacement and should encourage them to work internally. If they have a particular difficult person we can assist along with LAPD.

Good morning everyone today,s shift was calm. We responded to 3 calls for service at planet fitness regarding transients inside of the property. All transients were cooperative and relocate on arrival. We continued to check our local hot spots. No further activity to report.

Respectfully'
